137-08S ADJUSTABLE UTILITY STAND

3261

MODEL 137-08S ADJUSTABLE UTILITY STAND 10' TO 20' PLATFORM HEIGHT with Self Adjusting Staircase

- CONSTRUCTION:** This unit is manufactured of A500 grade B high strength square, round, and rectangular steel tubing that is welding into strong lightweight modules. These modules are then bolted together using grade 5 or better hardware resulting in solid, highly mobile equipment.
- CAPACITY:** 600 pounds or 2 men and equipment.
- PLATFORM & STEPS:** Standard platform size is 5 x 9'. Steps approximately 3' wide.
- MOBILITY:** Two 12" rigid and two 12" swivel casters are installed. Ground locking is provided by two screw jacks. A towbar attached to the lower front end of the stand allows for easy ramp towing.
- ADJUSTMENT:** The platform height is adjusted by use of Air over Hydraulic operated pump and self locking dual support columns. The system includes both air operated and manual pumps.
- SAFETY FEATURES:** Safety screen from the midrail to the deck of the work platform restrains Items removed from the aircraft.
- SPECIAL FEATURES:** Two self locking support tubes prevent adjustment slippage. The locking device provides a reliable lock at any height. This lock must be manually released prior to lowering the stand.
- FINISH**
 Standard; White Epoxy with Urethane Topcoat
 Options: Custom Colors
 Hot Dipped Galvanizing complete
- OPTIONS:**
 Special stand assemblies available
 Optional power modules
 Air service outlets Special casters
 Special colors Water/Chemical lines
 Special type finishes Special platform configurations
- SHIPPING SIZE:** Standard model is shipped partially disassembled on 1/2 flat bed trailer.
- SHIPPING WEIGHT:** 2200 pounds.
- EQUIPMENT USE:** General Mechanic Access around a variety of aircraft. Cabin and cargo door service or access for wide bodied aircraft.
